Summary

3 years of experience in Windows Administration, working extensively with Active Directory in enterprise and hybrid environments integrated with Azure AD and Microsoft 365. I have managed Active Directory topologies in multi-site environments, primarily using a hub-and-spoke model to ensure efficient replication between data centers and branch offices. I configured AD Sites and Services, including subnet mapping, site links, and replication schedules to optimize traffic over WAN connections. From a Windows Server and infrastructure perspective, I handled domain controller management, replication monitoring, and failover planning to maintain high availability. I also supported hybrid identity setups (on-prem AD + Azure AD) using synchronization tools, ensuring seamless authentication for cloud services like Exchange Online, Teams, and SharePoint.

Experience

Capgemini

Dec 2022 – Jan 2026

Analyst (Cloud Infrastructure Service)

Pune, India

- Administered and supported **Microsoft 365 (O365)** services including Exchange Online, Teams, SharePoint, OneDrive, and Azure Active Directory.
- Managed user **lifecycle operations** such as account provisioning, license assignment, access control, and profile management through Active Directory and Azure AD.
- Configured and maintained **Microsoft Intune** for endpoint management, device enrollment, compliance policies, application deployment, and security baselines.
- Supported **Azure cloud infrastructure** and virtualized environments using Citrix, VMware vSphere, ESXi, and Microsoft Hyper-V platforms.
- Performed installation, configuration, and troubleshooting of **Citrix Workspace**, XenApp, and XenDesktop environments.
- Managed **Windows** and **Linux servers**, including system administration, patch management, security updates, and performance monitoring.
- Executed monthly **server patching** and **vulnerability remediation** activities aligned with enterprise security standards.
- Monitored infrastructure health using enterprise monitoring tools and generated incident and outage reports.
- Handled **ServiceNow Incident Management**, resolving production issues within SLA timelines and improving service availability.
- Installed and configured enterprise tools including **Tanium client**, **AV Deep Security Agent**, **ILMT**, and **HPUD** utilities.
- Performed VM provisioning, ISO mounting, VM tools installation, and infrastructure migration activities.
- Implemented **Conditional Access policies** and device compliance enforcement to enhance organizational security posture.
- Automated administrative and operational tasks using **PowerShell scripting**, improving efficiency and reducing manual effort.
- Supported Microsoft Teams performance monitoring using **Call Analytics** and **CQD** for audio quality optimization.
- Maintained technical documentation and operational procedures aligned with ITIL practices.

Technical Skills

- Azure
- Microsoft 365
- Exchange Online
- Azure AD
- Active Directory
- Intune
- Citrix
- VMware
- Hyper-V
- Windows Server
- ServiceNow
- PowerShell
- Tanium
- Zabbix
- Endpoint Security
- ITIL

Projects

Bayers | Capgemini (2023 – 2024)

- Administered Microsoft 365 and Azure AD, managing user provisioning, licensing, and access control.
- Supported Azure infrastructure and virtualization environments using Citrix, VMware, and Hyper-V.
- Managed Windows & Linux servers, including patching, monitoring, and performance optimization.
- Resolved incidents via ServiceNow, ensuring SLA compliance and system availability.
- Implemented Intune device compliance, generated infrastructure reports, and automated tasks using PowerShell.

Fresenius | Capgemini (2024 – 2025)

- Administered Microsoft 365 and Azure AD, managing user provisioning, access control, and collaboration services.
- Configured Microsoft Intune for device enrollment, compliance policies, and application deployment.
- Supported Citrix VDI environments and managed Windows & Linux servers with patching and security updates.
- Monitored infrastructure and resolved incidents using ServiceNow while maintaining system availability.
- Managed virtualization tasks, enterprise security tools, Teams performance monitoring, and ITIL-based documentation.

Resideo | Capgemini (2025 – 2026)

- Managed Microsoft 365 administration including user management, licensing, and collaboration services.
- Implemented and maintained Microsoft Intune policies for endpoint security and device compliance.
- Supported Azure infrastructure and virtualization platforms including VMware and Hyper-V environments.
- Performed server administration for Windows and Linux systems including updates and performance monitoring.
- Executed vulnerability remediation and monthly patch deployment activities.
- Managed ServiceNow incidents ensuring SLA adherence and service availability improvements.
- Installed and troubleshooted enterprise tools such as AV agents, ILMT, and infrastructure monitoring utilities.
- Enforced Conditional Access policies to strengthen organizational security posture.
- Automated infrastructure tasks using PowerShell to improve operational efficiency.
- Maintained technical documentation and supported audit and compliance processes.

Education

Bachelor's Degree: Computer Engineering, Jawahar Education Society's Institute of Technology, Management & Research

Aug 2019 – Jun 2022
Nasik, India

Diploma: MET Bhujbal Knowledge City, Nashik

Jun 2016 – May 2019
Nasik, India

Certifications

- **AZ-204**[Microsoft Azure Developer Associate]
- **AZ-305**[Azure Solution Architect]
